

Validation Controls

Objectives

After completing the assigned readings and exercises, you should understand:

1. The role of validation in Web applications and why it is needed
2. The difference in client-side and server-side validation
3. The function of ASP.NET validation controls, including
 1. RequiredFieldValidator
 2. RangeValidator
 3. CompareValidator
 4. RegularExpressionValidator
 5. CustomValidator
 6. ValidationSummary
4. How the above validation controls can be added to a Web form and attached to other controls
5. How to group validation controls using Validation Groups

Readings/Materials (to be read BEFORE class)

- MacDonald Chapter 9

Assignment(s)

- Complete the code repository exercises associated with this module
 - [Instructions](#)  
 - [Starting Files](#)
- Complete readings for next class period (see course calendar)
